WEBSITE PROPOSAL · AUGUST 2026

Your site is ready to see, Vic.

We built it. You can open it right now on your phone. This proposal explains what's in it, what comes next, and what it costs.

LIVE PREVIEW

the-villagers-notes.vercel.app

PREPARED FOR

Vic Munala

DATE

August 2026

TOTAL

KSh 20,000

Everything on the preview is yours.

The site is built on clean code that you own outright — no platform lock-in, no monthly fee to a website builder. It runs on **Vite**, deploys to **Vercel**, and every file lives in a folder we'll hand over to you at launch.

Home — The Villager's Notes

Centered quote hero, who-you-are line, latest entries, newsletter signup. Your voice, front and centre.

Entries — All your writing

Filterable archive. Click any entry to read the full piece. Reading time, scroll progress, share button, prev/next navigation.

Projects — Novel & Play

Editorial layout for *Under the Mango Tree* and *Beneath the Surface* — with your real production photos.

Book — Order via M-Pesa

Real STK push. Customer fills the form, M-Pesa prompts their phone, they enter PIN, you get paid. Delivery address captured automatically.

Newsletter — Direct to readers

Readers enter their email to subscribe. Every signup goes straight into your private mailing list so you can email your readers new essays and book updates.

SEO + Social Sharing

When someone shares a link on WhatsApp or X, it shows your title, excerpt, and book cover — not a blank card. Google sees your full author profile.

The admin — so you can run it yourself.

Right now the site has a basic admin page at `/admin` where you can add entries and update your book details. It works — but it saves data only in your browser, which means if you switch to a different device, your changes aren't there.

Before launch, we'll connect the admin to a secure cloud database (free tier — zero monthly cost). Once that's done, you can add a new essay from your phone at a café and it goes live on the site immediately.

What the upgraded admin will do

All of this from a clean, password-protected page — no technical knowledge needed.

- 1 **Write a new entry** — title, date, category, body. Hit publish. It's live.
 - 2 **Edit any past entry** — spotted a typo in a 2025 essay? Fix it in 30 seconds.
 - 3 **Update the book** — change the price, paste in your Chapter 1 excerpt, toggle signed copies on or off.
 - 4 **Track orders & readers** — See customer names, phone numbers, delivery locations, order statuses, and your full email subscriber list in one place.
 - 5 **Works from any device** — phone, laptop, borrowed computer. Your content and customer records live securely in the cloud.
-

What this costs.

You came in with your design already done — the fonts, the layout, the feel. That's your work. We built the engineering: the code, the M-Pesa backend, the admin, the SEO. The price reflects that honestly.

WHAT WAS BUILT	VALUE
Site rebuild — 5 pages Home · Entries + Entry Detail · Projects · Book · All your real content loaded	KSh 12,000
M-Pesa STK Push backend Custom Daraja integration — serverless, keys never exposed to the browser	KSh 5,000
Email newsletter, Search indexing & Social previews Reader email capture · Google author profile ranking · WhatsApp link preview cards	KSh 2,000
Private Author Admin & Customer Tracker Manage essays, book settings, track buyer orders & delivery statuses, and export reader emails · with studio support	included
Deployment, DNS, domain setup Vercel deployment · your domain connected · SSL certificate	included
Design credit Design is yours — we didn't charge for what we didn't do	– KSh 4,000

Total

All-in · no hosting fees hidden later

KSh 20,000

Two milestones. Pay when the work is real.

NOW — DEPOSIT

KSh 10,000

Confirms the engagement.

ON LAUNCH — BALANCE

KSh 10,000

Due when your site goes live
on your domain. Not before.

05 — WHAT WE NEED FROM YOU

Four things and we go live.

All engineering, design, and M-Pesa integrations are handled on our end. These are the only decisions needed from you:

- ☐ **1. Your domain choice**
vicmunala.com or thevillagersnotes.com — whichever you prefer. We handle registration and DNS setup.
- ☐ **2. Your social handles**
Your Twitter/X and Instagram handles for the footer connect links.
- ☐ **3. Your M-Pesa Till or Paybill number**
So that when readers pay for your book, the money goes directly to you. One SMS verification and it's live — we handle everything else.
- ☐ **4. Deposit — KSh 10,000 via M-Pesa**
Send to +254 713 812 392. Send a screenshot on WhatsApp or Signal and we initiate launch.

YOUR ADMIN LOGIN — READY NOW

Your private author dashboard is already live at **the-villagers-notes.vercel.app/#/admin**

Password: **village2026** — change this anytime on request.

"Built to last. Owned by you."
