- ✓ **Your own domain** — thevillagersnotes.com is yours,

○ WHAT WE FINISH IN PHASE 2

- **M-Pesa payments to your account** — Book orders and paid article payments go directly to your own Safaricom number. Right now we need to complete the integration so every shilling lands with you, not us.
- **Newsletter emails that actually reach your readers** — Subscribers are being captured, but the emails aren't going out yet. We wire up the delivery system so you can reach your readers directly whenever you publish.

live, with a full SSL certificate (the padlock in the browser bar).

✓ **Google Analytics** — We set up tracking so you can see exactly who is reading your work, where they come from, and what they spend time on.

✓ **Google Search Console** — Your site is registered and your sitemap is submitted. Google is already crawling and indexing your pages.

✓ **Social sharing previews** — When someone shares any page on WhatsApp or X, it shows your title, your excerpt, and your book cover. Not a blank link.

Your admin is ready for you, Vic.
